Lactococcus lactis subsp. cremoris
Lactococcus lactis subsp. lactis biovar. diacetylactis
Streptococcus thermophilus
Lactobacillus helveticus
Lactobacillus lactis

Properties

CHOOZIT™ Alp D LYO 100 DCU represents a medium to fast acidifying culture for the production of semi-hard and hard cheese. Due to its slow citrate fermentation, only little CO₂ is formed slowly. CHOOZIT™ Alp D LYO 100 DCU has a higher proteolytic activity than purely mesophilic cultures due to the addition of Lb. helveticus and Lb. lactis which improves the aroma in semi-hard and hard cheeses.
