Geotrichum candidum

Properties

GEO 15 LIQ 10 D is an yeast-like form.

Rapid de-acidification of curd by metabolism of lactic acid due to rapid growth (24-48 hours) of a selected, easily controlled surface flora. Enzymatic activity is weak compared to *Penicillium candidum*, but aroma and flavour development is excellent. Enhances the implantation of *Corynebacteria* by neutralising the acid and producing growth stimulants. Enhances the final appearance of the cheese, reduced proteolysis (less ammonia) and contaminant control.
